Re: Confirmation on ecoBETA Waterwise Awards and Recommendation

Dear Lisbeth Sylvestre

This is a letter to confirm that ecoBETA have received two awards from Waterwise. The ecoBETA siphon retrofit was awarded the Waterwise Marque in 2007 and the ecoBETA ecoFLUSH was awarded the Waterwise Marque in this award covers all variants of the ecoFLUSH (i.e. handle or button operated). The Waterwise Marque has now been renamed the Waterwise Recommended Checkmark and this has been retrospectively awarded to both products. The Marque and Checkmark assess products for their water saving potential, design, operation and quality.

In addition to these awards the ecoBETA siphon retrofit has consistently shown high levels of water saving in domestic retrofit. The Waterwise Evidence Base is an ongoing research project supported by the UK government, water regulators and water companies, it assesses and evaluates all large-scale water efficiency trials and programmes in the UK, this work shows that the ecoBETA siphon is the most effective water efficiency retrofit device in terms of overall water saving.

As you know Waterwise has worked with ecoBETA over the past 6 years and I would strongly recommend your products. I would be happy to provide a reference regarding ecoBETA for any future clients.

Yours sincerely,

Jacob Tompkins
Managing Director
Waterwise
